Managing Director, PromptLee

# PROMPTLEE

**Sean Price**
Chief Technical Officer, PromptLee

# Get Into AI

## a UKRI funded project

**Special thanks to**
Jonathan Roberts

Event catering funded by UKRI Get Into AI project

# CODE OF CONDUCT

- Always be **respectful**
- Harassment and abuse are **never** tolerated
- If you are made to feel uncomfortable, or witness harassment, speak to us, or Pontio security
- Failure to follow the CoC will result in you being asked to leave the event immediately
- The CoC applies to everyone attending the event, including staff, sponsors, and participants

This event will follow the **Major League Hacking** Code of Conduct:
https://github.com/MLH/mlh-policies/blob/main/code-of-conduct.md

# THEME ANNOUNCEMENT

The theme has been specifically designed to get you using the sorts of tools and technologies PromptLee would want a potential future intern or employee to use.

**Drum roll please…**

# THEME ANNOUNCEMENT

The hackathon theme is:

## SUSTAINABLE HOLIDAYS

# SUSTAINABLE HOLIDAYS

*“It's almost summer and lots of us are already planning our getaways, however, how many of us ever stop to think about how our travel plans are impacting the planet?*

*Your challenge is to create the **ultimate holiday planner**, providing the best experience at the lowest carbon cost for holiday makers. In return, travel agents receive key insights.”*

# THE JUDGE'S SPECIFICATION

Let's be clear, you can **create whatever you like**, but here is what our judges are looking for:

**The holiday makers**

- Holiday makers should provide their basic holiday preferences e.g. when, where, and the sorts of activities they'd like to do.
- Activities, their details, costs, and environmental impact should be displayed in an itinerary.
- The itinerary of the holiday plan can be refined based on user feedback and preferences.

**The travel agents**

- Travel agents can view insights e.g. popular destinations, typical budgets, and sustainability metrics.

# HELPING HANDS

Google

To help you on your way, each team will receive a **Google Maps API** key and a Q&A session with **Paul Kinlan** from **Google** at 3pm today. You can choose to use this resource however you like, or not at all.

The organisers and academic staff will act as mentors, who are able to offer help if needed.

You are also encouraged to collaborate ***with other teams*** to share knowledge on specific tools and technologies.

You can use AI to help you, in fact we encourage you to use it, but there is a big difference between using AI as a companion, and vibe-coding. **Vibe-coding is strictly forbidden.**

**Whatever you create, you must be able to explain what it is doing and know how it works.**

# INTERPRETING THE BRIEF

It doesn’t matter if you decide to build an all-in-one mobile app, a package holiday website, or the next Holiday Tycoon game, the choice is up to you. Be creative and feel free to interpret the brief however you like.

**The only constraint is the time remaining.**

# PRIZES

3 teams will walk away with a share of the prize money at the end of the event:

1. **£1,000** top prize for the winning team
2. **£500** prize for the second-place team
3. **£250** prize for the third-place team

Regardless of who comes out on top, the aim of the event is to have fun, learn lots, and collaborate.

If you impress our judges from PromptLee at any point during the hackathon, including during the pitches, there could be the opportunity for an **internship**, or a **job** in it for you.

# SIDE QUESTS

Although your ability to meet the brief, your technical skills, and cohesion as a team will be the main judging criteria, you can score extra points by completing side quests:

- **Best Branding and Promotional Material e.g.:**
  - Product Name and Logo
  - TV Advert
  - Poster
  - Merch Concepts
  - Mascot
- **Mario Kart Highscore** *(Big thanks to BUGL for supporting this)*
- **Design the PromptLee Formula 1 Car** *(https://provisual.app/3d-models/355-formula-1-racing-car)*

You can choose to do one, all, or none!

# SCHEDULE

**Friday 6th March**

- **11:30 AM:** Registration
- **12:00 AM:** Briefing and team formation
- **12:30 PM:** Lunch
- **3:00 PM:** Google Maps Q&A (Skills Session)
- **6:00 PM:** Dinner
- **7:00 PM - 9:00 PM:** Big idea pitches

**Saturday 7th March**

- **12:00 AM:** Midnight snack
- **3:00 AM - 5:00 AM:** Night shift check-in
- **9:00 AM:** Breakfast
- **11:00 AM:** 3-minute pitches start
- **12:00 PM:** Judging and lunch
- **13:30 PM:** Awards ceremony and closing

# PITCHES

There are three pitches your teams will make.

The **Big Ideas Pitch** is a 5-minute presentation/discussion on your team's chosen direction. This is your opportunity to have a private one-to-one discussion with the judges about your idea in the seminar room. A big idea pitch schedule will be shared at dinner based on random allocation and will take place between 7pm-9pm.

The **Night Shift Check-In** is an extra opportunity to have face time with the judges.These will take place between 3am-5am in reverse order to the big idea pitches.

The **3-Minute Pitch** is where you will present your final solution in front of every other team and the judges. Timing will be **strict**, you must share the presentation between all team members, and you must prepare a live demo. The next team to present must be ready to go on stage.

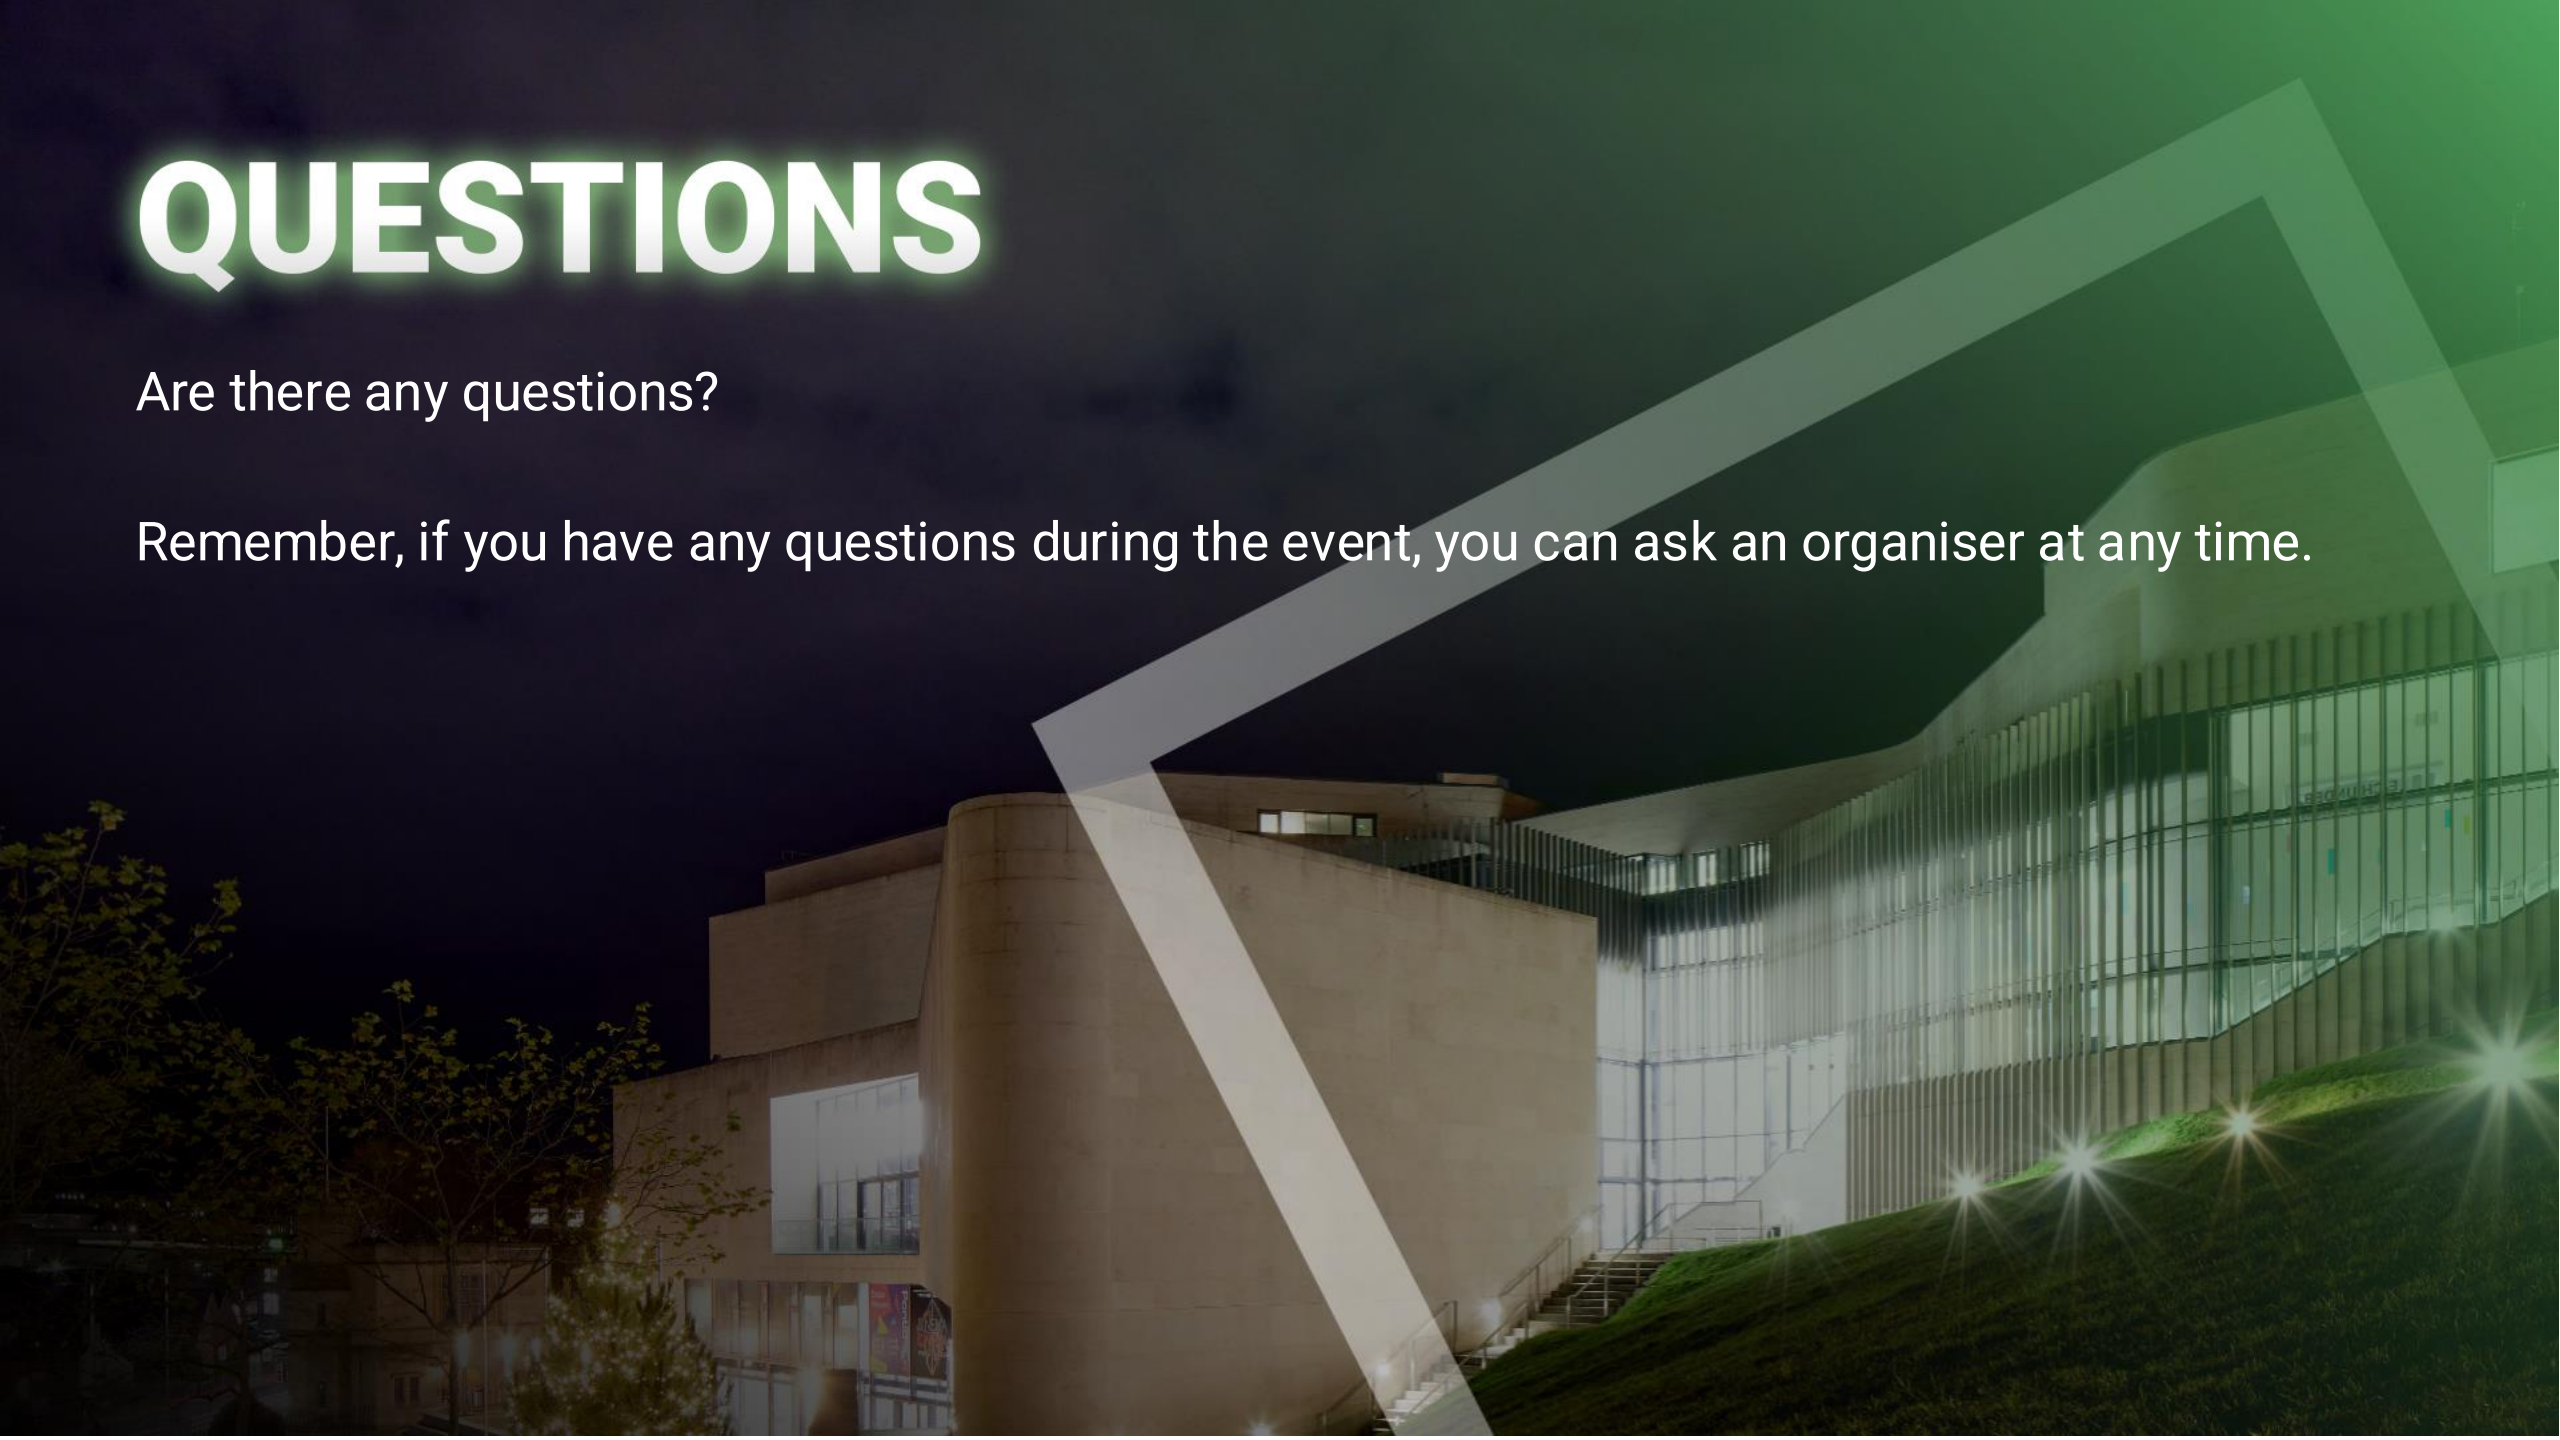
# HOUSEKEEING

- Keep your work areas tidy and keep walkways clear
- Keep food and drinks away from electronic devices and eat in the dining area when possible
- In the event of a fire alarm, exit by the nearest fire escape and proceed to an assembly point
- Areas for naps will be made available over night
- You are welcome to leave and return, however you **must** inform an organiser beforehand
- Do not waste food or drinks. If you take a can, or bottle, finish it (sharpie your name)
- Do not stand on chairs or tables at any time
- Do not attempt to move heavy furniture without the permission of the organisers
- Speak to us if you have any questions or concerns
- Have fun and share knowledge!

# QUESTIONS

Are there any questions?

Remember, if you have any questions during the event, you can ask an organiser at any time.



# TEAM FORMATION

We will now split into **teams of 3**.

We encourage you to join a team with people you do not know and who are in different year groups/degree programmes than you.

The most successful hackathon teams often comprise members who do not know each other well, who have different backgrounds, and varied levels of experience.

**Once a team is formed, it cannot be changed.**

Once you settle on a team name, come forward.

# READY, STEADY, GO!

Lunch is served.
The clock is ticking.
You may now begin.
Good luck and have fun!
